FULL STACK DEVELOPER

ABOUT ME:

FullStack Developer with experience in building frontend and backend applications using technologies such as React, JavaScript, TypeScript and Node.js. I have a comprehensive portfolio of projects that demonstrate my skills in creating dynamic user interfaces and efficient API integrations. Passionate about developing innovative solutions, I consistently focus on improving performance and usability. With a strong commitment to continuous learning and dedication. I work very well in a team and I am very communicative, I believe that dialogue encompasses results and performance, I am dedicated and a very fast learner. After many years in the job market with Electrical Engineering, I developed several skills in the corporate environment.

PROFESSIONAL EXPERIENCE:

FREELANCER – Jan/2024 | Today

Desenvolvedor FullStack:

During my personal development in the technology field, I have completed a series of projects focused on expanding my knowledge and applying best practices in software development. These projects demonstrate my ability to overcome challenges and problems, especially learning new technologies and delivering functional solutions. All of them are available in my portfolio, which reflects my continuous progress in React, JavaScript, TypeScript, and Node.

EDUCATION:

FullStack Programmer by Dev Club, 2023.

KNOWLEDGE AND SKILLS:

Frameworks: ReactJS, JavaScript, Node, TypeScript, HTML, CSS;

Banco de Dados: Postgres, MongoDB;

Sistemas Operacionais: Windows;

Metodologias Ágeis: SCRUM.

SoftSkills: Analytical skills, proactivity, resilience, interpersonal relationships

LANGUAGES:

Portugueses - Native

English – Intermediate
